JOHN N. IRWIN,

By the Governor, N. O. MURPHY,

Secretary of Territory. Published by order of the Board of Supervisors of Gila County, Arizona, made and entered on the 1st day of

April, A. D., 1891. CHAS, T. MARTIN, Clerk.

uge in 1890. According to the report of the Director of the Mint on the production of precious metals for the year 1890 the gold product of the United States was 1,588,880 fine ounces of the value of \$32,845,000, an increase of \$45,000 over the product of the preceding year. The silver product of the minesapproximated 54,000,000 ounces, corresponding at the average price of silver during the year to \$57,225,000, and at the coining value of silver to \$70,464,645. This is an increase of 4,500,000 fine ounces in the silver product of the country as compared with last year. The coinage executed during the last Salendar year was the largest in the Liberty Enlightening World history of the mint service, aggregating 124,025,365 piecen; of the value of \$61,054,882.84, of which \$20,467,182 were gold and \$38,043,004 silver dol-

According to comparisons made at the Paris Miners' Congress, Belgian miffers at present receive the poorest pay, their average wages being but 50 cents daily, while French miners receive about 75 cents, and the Germans from 75 cents to \$1. This has been the case with the Germans, however, only since their strike in 1889.

ance of Christ In 1899.

A special to the Globe-Democrat from New Haven, Conn., says: Prof. C. A. L. Totten, of Yale, says that a mathematical calculation, founded on biblical truths, proved beyond preadventure that the Messiah will come

again before the year 1900, "Some papers have published," Prof. Totten said, "that I predict the end of the world within this century. This is an error. I don't think that the end will come for a million years. But here is what I do declare, not prophethe Bible, in the parables of the laborwith their lamps. A generation in its true Biblical sense, is three score and ten, seventy years; and so the fiftyseven generations traced through the genealogies in the Old Testament equal 3990 years. Hence the fifty-eight generation began with the 3991st year of the world. The hours mentioned in a special election to be held in the sey. the vineyard parable are each 153 years. eral counties of this Territory on the So, multiplying these by the twelve second Tuesday of May A. D., One hours, we have 1836, which added to Thousand Eight Hundred and Ninety 3991 equals 5827 years of the world. One, to elect Delegates to a Convention and the completion of the vineyard appointed by said Act of the 16th Leg. parable. Then, as the work is naturally concluded at sundown, the parable of in the city of Phonix on the first Mon. the virgins and their lamps properly day in September A. D. 1891, for the follows, and this parable, according to

> make 5897. "Now this 5897 A. M. (year of the world) corresponds to March, 1899. Why? For these reasons: Cæsar pushed the beginning of the old Hebrew year from the autumnal equinox (in September) ahead to March. England pushed the year ahead from March to January and Pope Exigus must have taken the beginning of 4001 for 4000 in computing the birth of Christ. We thus gained six months, plus three months, plus one year, which equals one and three-fourths years. Deduct this from 5897 and we have 58951, the time at since the birth of Adam will see the customers.

other than Christ himself. "Now, what is 58951 A. M. in our A. D. years? Herod ordered all the innocents of 2 years and younger to be that, the eclipse of the moon took place. Three Delegates shall be elected by It took place in the year 3998, according to Josephus, and Herod died in "And I do hereby offer a reward of that year. Now, Herod limited his Fifty Dollars for the arrest and convict order to children of 2 years, because about two years before the Magi in formed him of the birth of the Saviour. So Christ was born two years before

the eclipse and the death of Herod-"So you subtract 3995 (birth of Christ) from 58951 A. M. to find the Done at Phoenix the Capital this A. D. year, and you leave 18991 A. D. twenty-fourth day of March A. D. or, in Merch, 1899, the bridgeroom will come and will awaken the foolish

# The Copper Queen Mine.

The Financial and Mining Record publishes the following incident in the early history of the Copper Queen, study of a language which ought to be General John A. Wiley bought that a part of the commercial education of a If a man is lying insensibly drunk on mine soon after it was located, for young man in this country." \$8,000-one quarter for himself, and Production of Gold and Silver, and Coin. the other three quarters for friends; but through the negligence of the man to whom he intrusted the details of purchase and payment of the money, he lost the mine, as an agent of Flood & Mackay stepped in and gave the poor prospector a cool \$100,000 and the retention of a one-cighth interest for his claims, and entered into an agreement with the millionaire to work the mine on a certain percentage. The company was stocked for \$12,000,000. So, you see, the General's one-fourth interest would have stood him \$3,000,000. The Copper Queen is still a great mine, while it is said that the agent who took the contract of working the same has pulled out as high as \$60,000 in one month for his percentage.

If the question be asked: Is gold and silver mining on the average necessarily unprofitable, we would unhesitatingly say no. With the exercise of the ordinary care and prudence, which are essential in making any other investment profitable gold and silver mining become one of the most profitable industries in which capital can invest; but, unfortunately, a majority of those According to the estimates of Inter- fore, is, not that, on the whole, the the works going until the 15th of this nal Revenue Commissioner Mason, not actual expenditures in producing gold month, by which time the difficulty less than \$9,000,000 will be needed to and silver are greater than the value of with the Montana Union will be effec-Beastiful and Lasting Present. pay the sugar bounties for this year— the metal produced, but that the indus- taully adjusted.
